

Naval Air Station Jacksonville

Occupational Safety and Health Office FY 2002

VISION

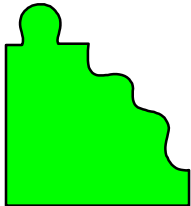

Naval Air Station Jacksonville Occupational Safety and Health Office is recognized as the Southeast Region leader in the delivery of Safety and Occupational Health support.

MISSION

To enhance operational readiness by enabling personnel to establish, promote and maintain a safe and healthful workplace.

To provide leadership, mentoring, technical guidance and resources to aid our customers in protecting their personnel and material assets; prevent mishaps; maintain regulatory compliance; and control hazards, hazardous occupational exposures and costs.

GUIDING PRINCIPLES

Our most important undertaking is mentoring our customers so they can protect people and property.

We are committed to ensuring personnel have the knowledge and tools necessary to carry out their safety and health responsibilities.

We teach our customers to make decisions that are practical, technically sound, and based on ORM principles.

We are responsive and flexible in anticipating and meeting our customer's needs.

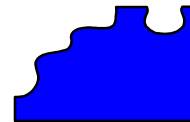

We strive to meet 100 % compliance with all regulatory requirements.

We promote/support command responsibility for safety and health issues.

We are committed to maintaining the highest levels of technical proficiency within the safety and health profession.

We are dedicated to maintaining the highest level of professionalism, credibility, and positive image for the NAS Jacksonville OSH team.

We strive to continually improve our process.

GOALS

Use the principles of the Process Review and Measurement System as a tool for NAVOSH Program improvement throughout NAS Jacksonville.

Mishap Prevention - To reduce and maintain on-the-job mishaps to the lowest practical level.

Regulatory - To achieve and sustain the highest degree of regulatory compliance.

Supervision - To ensure managers and supervisors are equipped, qualified, prepared and accountable for safely conducting daily operations..

Training - To ensure our workforce is fully trained and qualified to support the command mission..

Self-Assessment - To honestly assess our performance toward achieving and sustaining these safety models; to implement changes necessary to achieve goals and use as a tool for continuous self-improvement throughout the year.

Ensure safety is fully integrated into all Command processes and operations for the protection of our personnel and assets.
